

① hello.c $\xrightarrow{\text{preprocess}}$ hello.i $\xrightarrow{\text{compile}}$ hello.s $\xrightarrow{\text{Assemble}}$
hello.o $\xrightarrow{\text{link}}$ hello.exe main()

function | Data Type.

implement $\longrightarrow$ library.

C / C++ : Source code : library.

library = Data Constants + Functions + Type

Struct Management
 functions,
 → Allocation
 - Release
 - Use.

Function : Define करता आगत.

Type : Define करता आगत.

SERVER.

Define करता function call करत.

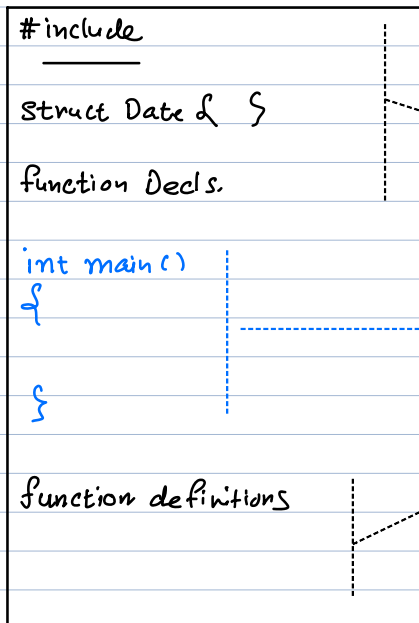

Define केलेल्या type चे instance तयार करत, आणि ते वापरत.

Useful functionality तयार करता येते.
